**ASPARAGUS SPRENGERI (NEW)**

One of the best new plants introduced within ten years. Sprays 4 to 5 feet long, drooping from a pot or basket; of fresh green feathery foliage. Useful for bouquets, wreaths or sprays; remaining perfect for weeks after cutting. Grows freely the whole year round. Extremely valuable for all purposes. Grows readily from seed.

Seed, per packet 10c.; Strong plants 15c., 25c. and 50c. Hanging Baskets $1.50 and $2.00 each.

its beautiful variegation in the hottest sun. And for a border plant we know of no other which will make the show and do so well as Savitsi. 15c. each.

**NEW BEGONIA GLORIE DE LORRAINE**

This is undoubtedly the greatest gem in Flowering Begonias yet introduced. It grows from 12 to 15 inches high, forming naturally graceful, bushy specimens, which, from October to April, are completely smothered with soft rosy pink flowers, and is a plant that is destined to become very popular. Nice young plants. Each 30c.

**NEW PINK CARNATION**

*Mrs. Thomas W. Lawson.*—This is the sensational "Lawson Pink," for the original stock of which thirty thousand dollars ($30,000) was paid a year ago. It has been fully described in many newspapers throughout the country, and is without doubt the largest dark pink Carnation at the present time. Each 20c.

**COLEUS—NEW REGAL**

Vigorous and grows to an unusually large size; colors and markings regally rich and brilliant. 15c.
NEW ROSE "LIBERTY"

Undoubtedly the finest crimson Rose of modern times, and a grand addition to the Hybrid Tea class. In color it is a warm, rich crimson-scarlet, and surpasses its rival—the well-known Meteor—in abundance of bloom, size and color, never showing the slightest tendency to blacken, which is so characteristic of Meteor, and most of all by its exquisite fragrance, a quality altogether wanting in Meteor. The habit of the plant is simply perfection, throwing up strong, stout stems from the base. A great future is predicted for this famous rose, as it is such a marvellous bloomer.

Young Plants, Each 50 cts.

NEW WEEPING LANTANA

Rapid growing plant, of graceful, drooping habit, producing clusters of flowers at the base of each leaf. The flowers are a most delicate shade of rosy lilac, appearing in great abundance. Unsurpassed for filling vases and baskets, whether used alone or with other plants. 10c., 3 for 25c.

CRIMSON RAMBLER

In Tree Form.

We have a limited number of these very beautiful and popular Roses in Tree Form. They are fully 5 ft. high, are well branched, and very strong and vigorous. Roses in this form make a splendid show at once.

Price, $1.00 Each.
New "Christmas Tree" Aster

By far the most free-flowering class of Asters yet introduced, and quite different in habit from all other varieties of Asters. The plant grows about 15 inches in height, branching out freely and regularly, lower branches are the longest, and measure from tip to tip 20 to 24 inches; resembles a Christmas Tree, which suggests its name. The flowers are of medium size, perfectly double, and finely imbricated. As many as 80 and 100 flowers have been counted on a single plant. In mixed colors.

Per pkt. 15c., two pkts. 25c., five pkts. for 50c.

Aster Hohenzollern. The largest flowering Aster in existence up to now! The flowers, which attain 8 inches in diameter, resemble the Japanese Chrysanthemum, and are of un-surpassed beauty. This variety is one of the finest and most valuable for cut flowers, the stems growing often from 16 to 20 inches in length. In two colors—snow white and bright rose.

Each per pkt. 25c.

New "Ostrich Feather" Aster

A new strain of Asters, remarkable for their great beauty and value both for garden decorations or for growing for cut bloom. The plants grow from 15 to 18 inches high, and of a very strong luxurious branching habit. The flowers measure from 4 to 5 inches in diameter, borne on long stems. It is without doubt a valuable addition. We offer it in mixed colors.

Per pkt. 15c., two pkts. 25c., five pkts. 50c.

Ostrich Feather Pure White. Price 10c. per pkt.

Giant Snow-white Victoria Aster. The Victoria Asters have long held a leading place among asters, their free growth and perfect-formed flowers being much prized both for bedding and cut flowers. This new variety is the first of a giant type to be offered, and is said to bear flowers averaging 5 inches across, of a pure snow white. Per pkt. 15c., five pkts. for 50c.

DAYBREAK. This beautiful Aster, which was introduced to the public three years ago, has proved itself worthy of the very wide and flattering reception it has met with everywhere. It is one of those rare gems that have come to stay; no private garden is complete without it, and for florists it is simply unsurpassed. The flowers are round as a ball, very large and full, on long stems; the color a charming sea-shell pink; the plant flowers very early and is a continuous free bloomer, a compact strong grower, and in all respects a desirable acquisition. Packet 10c., three for 25c.

Centaurea Imperialis

New large flowering hybrids. The flowers are of the same graceful form as the C. Margaritae, but of nearly double the size, and are borne on long stems in enormous abundance from July until frost, and are highly fragrant. If cut when partially open they will keep for ten days. For beds or mixed borders they rank with the finest annuals, while as cut flowers they are sure to become popular.

Mixed colors per pkt. 10c. White per pkt. 10c.

NEW GIANT WHITE CENTAUREA
Centaurea Americana Alba.

The stems shoot up from one to three feet, sturdy and strong, branching near the ends, and every branch bearing a bloom. The color is almost pure white. It is an excellent plant for cut flowers, the flowers lasting several days when cut and the stalks being long and wiry. Pkt. 10c.

MARGUERITE CARNATION

Giant White Perfection. The largest and most perfect of all Marguerite Carnations. Very double, and comes true from seed. The seed we offer is very fine, producing almost entirely double flowers. Pkt. 25c.

Giant Improved Marguerite Carnations. All colors mixed. The most perfect and largest of existing Marguerites. Very double and extra fine. In colors like the above. Comes into flower same season seed is sown. Per pkt. 20c.

Helianthus Cucumerifolius Grandiflorus

The new varieties of the popular single-flowering Helianthus Cucumerifolius—the Miniature Sunflower—with semi-double and double flowers measuring three inches across, are of golden yellow color, flat, vaulted and bordered, with partly ruffled and partly smooth petals. They come over 60 per cent. true from seed, and yield excellent material for cutting. We offer ten distinct varieties, separate or mixed, including Stella, at 15c. per pkt.

NEW CLIMBING DOLICHOS
"DAYLIGHT."

This grand climber is most desirable both for its beautiful flowers and dense growth of foliage. The vines are very vigorous and of quick growth, well set with large and luxuriant dark-green leaves. The vines quickly grow to a height of eight to ten feet, and blossoms profusely from base to summit, the large spikes of pure white flowers standing out boldly from the rich green foliage. As the flowers drop from the long spikes they are succeeded by broad, velvety, showy white pods, which retain their purity and freshness of color a long time before drying up. The vines are hardy and the seeds may be planted one inch deep in rich soil as soon as the trees are well out in leaf. Pkt. 10c., oz. 25c.
New and Choice Vegetable Seeds

New White Bush Bean

The Prize Winner.

Mr. A. I. Root, the man who introduced Grand Rapids Lettuce and Ignotum Tomato, has the following to say about this new Bean: "During the past season we grew two crops (ripe and dry) of these on the same ground. Quality and yield were both ahead of any white beans we know of." This new Bean is well worthy of a trial, as it is said to ripen earlier than any other white seeded wax Bean. Per pkt. 10c., lb. 30c.

HENDERSON'S "EARLY SPRING" CABBAGE

Mr. Henderson claims that this is the only extra early round flatheaded Cabbage in the world!—coming in with the Wakefield, and yielding one-third more than any other Extra Early. This variety is of the Early Summer type, but about one-fifth smaller, and has only four to five outside leaves, and these so small that it may be planted twenty-one inches apart, 13,500 to the acre. 10c. per pkt., 50c. per oz. The seed we offer is direct from the originator; we can supply a European seed of "Early Spring" Cabbage for half the price.

Australian Brown Onion

This Onion is of recent introduction, and its extraordinary keeping qualities have made it a favorite variety with those who have planted it. The bulbs grow to a good marketable size and are very hard and solid. They ripen earlier than either Yellow Danvers or Red Wethersfield, are beautiful brown color and mild flavor. A good thing in their favor is the fact that crop runs uniform in size and shape; nearly every plant produces a fine Onion. Pkt. 10c., oz. 15c., 1-4 lb. 50c., lb. $1.50, postpaid.

"MASTERPIECE" PANSY

This strain represents really the highest perfection of Giant Pansies, and for this reason was named "Masterpiece." The growth of the plants is strong and bushy, lasting well in the warm, dry summer weather. Flowers of enormous size, borne above foliage on strong stems. Perfectly round in form, and the richest combination of colors. Per pkt. 25c.

Fringed Ruffled Giant Petunias

This new strain originated with the famous specialist in California, who, some years ago sent out the California Giant and Ruffled Giant strains. It differs from the latter in having, in addition to the ruffling, a very fine fringed edging, making a very handsome flower. In size and coloring this new strain is equal to the finest now in commerce, and must be regarded as a decided advance in this important flower. 25c. per pkt.

"Grand New White Sweet Pea.."

SADIE BURPEE (Eckford's). Flowers are of the very largest size and purest snowy white. The difference from Blanche Burpee is chiefly shown in the taller standard, which is also more pronounced in its hooded character. The large flowers come in threes at the summit of a stiff stem and are of firm substance, lasting well when cut. It is the finest as well as the largest pure white for cut flowers and exhibition purposes. Mr. Eckford is fully justified in his claim that this is absolutely the largest and grandest white sweet pea ever introduced. Pkt. 5c., oz. 15c., 1-4 lb. 25c.
...NEW CAULIFLOWER...

“MATTITUCK ERFURT.”

The originator of this very superior strain of Cauliflower has this to say in regard to it:

“I am sending you 1 lb. of Cauliflower seed, and am willing to wager my reputation as a Cauliflower seed grower that it is the very best pound of Cauliflower seed in the market to-day. Every seed with good care will make a head. Six heads trimmed ready for market brought the scales down at 60 lbs. You can recommend the seed with perfect confidence. It heads with Snowball; but is much larger. The first ounce of this seed was sold by the originator for $8.00.” We are able to supply only a limited quantity, but can give you a trial packet for 25c. If you grow Cauliflower it will pay you to try some of this seed. We hope to be able to supply in larger quantities another year.

Paul Rose, or Petoskey Musk Melon

It is a cross of the Osage with Netted Gem, and combines the sweetness of the former with the fine gray of the Gem, making it a very handsome Melon. The fruit grows uniform in shape and size, the average diameter being about 5 inches; flesh very thick, firm and beautiful; deep salmon or orange color; deliciously sweet and melting.

Pkt. 10c., oz. 20c., 1-4 lb. 40c., lb. $1.00.

Livingston's Magnus Tomato

This distinct new Tomato was first offered to the public last season. It is of the same color as the Acme, being a glossy red, but grows thicker and more solid than that variety, and is in every way a more desirable Tomato. It is medium early, perfect form, grows large and attractive, and must please all who grow it. The Tomatoes are very deep from stem to blossom end, some growing almost globe shape. It ripens evenly, does not crack about the stem, and the flavor is all that could be desired. Our Magnus seed comes direct from the originator. Pkt. 10c., 1-2 oz. 30c., oz. 50c.

GRAINGER'S..... RELIABLE VEGETABLE SEEDS

We are taking extraordinary pains with our stocks of Vegetable Seeds this year, and our customers can depend on our supplying only the very best quality of fresh seeds. We are determined to buy the very best we can get, even if we have to pay more, and charge a little more, for we find that cheap seeds don't pay, and the dearest is often cheapest in the end.

While we exercise the greatest care to have all seeds pure and reliable, we do not give any warranty, expressed or implied, and will not be in any way responsible for the crop, nor for any loss or damage arising from any failure thereof in any respect. If the purchaser does not accept the seeds on these terms and conditions, they must be returned at once, and the money that has been paid for same will be refunded.

**NASTURTIUMS**

Were we asked to name the three most popular flowers that are grown from seed, we should answer unhesitatingly, NASTURTIUMS, PANSIES, and SWEET PEA. Few flowers impart such rich "bits of beauty" to the garden as the different types of NASTURTIUMS. In addition to their use in the garden and on trellises, we would recommend planting the seed freely along fences, hedges, and walks, or wherever it is desired to have bright colors. You can not have too many Nasturtiums!
